Professional Summary

Shopify Developer with 3+ years of experience delivering 35+ Shopify stores for international clients across the US and UK. Skilled in Shopify 1.0/2.0 theme architecture, custom Liquid development, and REST/GraphQL API integrations, with a consistent focus on performance optimization and responsive design. Comfortable owning projects end-to-end, from client requirements through launch, using Shopify, React, and modern frontend technologies.

Experience

Software Engineer, FirstWire Apps – Lucknow, UP Sept 2024 – Present

- Developed and launched 15+ Shopify stores using Shopify 1.0 and 2.0 architectures.
- Built custom Shopify sections and Liquid components, improving store flexibility.
- Integrated Shopify REST and GraphQL APIs to build custom functionality and automation.
- Optimized store performance achieving 25–40% faster page load times through code, image, and asset-level optimization.
- Collaborated with US and UK clients to deliver scalable eCommerce solutions.

Software Engineer, FirstWire Apps – Lucknow, UP Feb 2022 – June 2024

- Led the development of more than 20 projects from concept to production, showcasing strong project management and technical expertise.
- Successfully worked with clients from the US and UK, resulting in projects that met the needs of international markets.
- Stayed up-to-date with Shopify updates, maintaining familiarity with both Shopify versions 1.0 and 2.0.
